

Fixalert

Automating coordination & communication

Computerized Maintenance Management & Task Management System

Hi, I'm Pawel! I am the Office Manager here.

I want to make sure all rooms are maintained properly.

Earlier, if someone faced a problem it was troublesome.

01 They look around for someone to complain to

02 Use different mediums to complain

03 But most don't bother to report and just leave

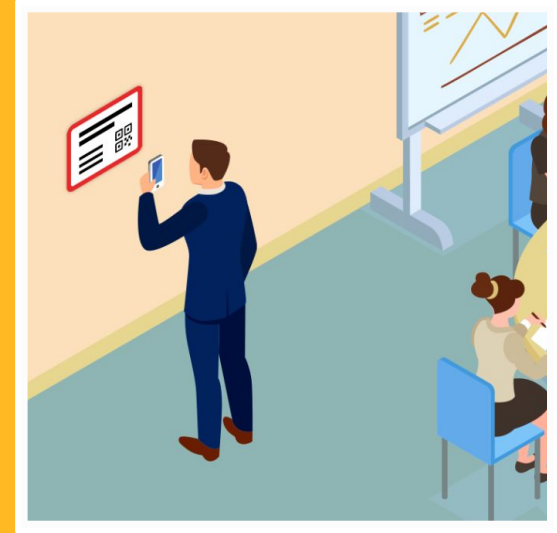

An illustration of a man in a black suit and red tie standing in an office. He is holding a smartphone in his right hand. A speech bubble above him contains text. In the background, there is a desk with a computer monitor, keyboard, and office chair. On the wall, there is a QR code with a logo above it.

Fixalert is a digital
solution that covers
every room!

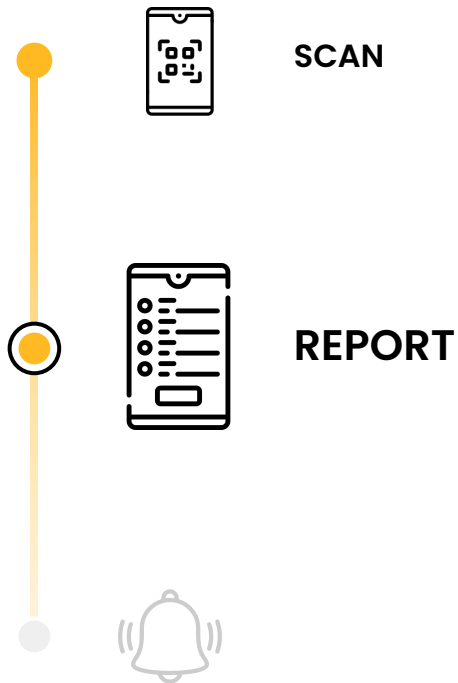

SCAN

If someone has a complaint, they simply need to scan the QR code. It works with all types of smartphones.

A micro-survey helps them specify and report issues. They can also attach pictures and videos.

The responsible person gets a ping on their phone with the location and the problem description.

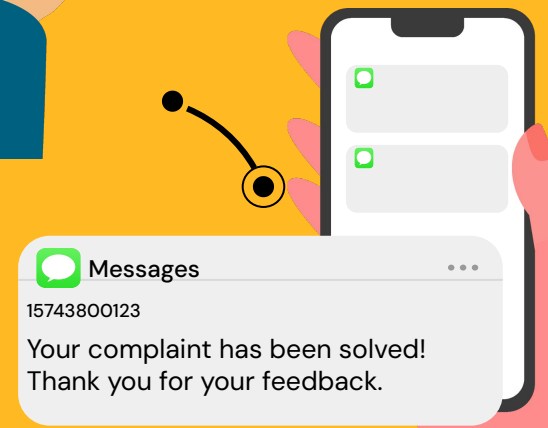

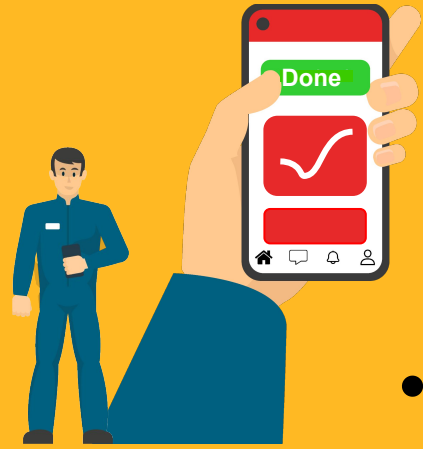

Test it yourself!
Scan the code and
submit your
complaint.

Scan the QR to report
problem:

When my employee resolves the issue, they mark it as completed in their app, and the complainant automatically receives a text message confirming that their problem has been resolved.

Fixalert made the
hardest part of my job
easier.

The building administrator always gets an up-to-date live status report.

An illustration of a desk with a wooden grain pattern. At the top, a laptop is open, showing a grid of text on its screen. To the right, a black computer mouse is visible. In the center, a red clipboard with a yellow clip at the top holds a white sheet of paper. The paper contains a title and a list of items, each preceded by a checkmark.

Fixalert covers all buildings and devices

- Rooms
- Machinery
- Elevators
- Hallways
- Entrance halls
- Kitchens
- Devices (e.g. printer)
- Parking spaces

The results are HUGE!

- ★ Save time and money by automating communication and coordination.
- ★ Better reviews on public platforms.
- ★ Employees are more efficient, especially across multiple buildings.

How's it made things better?

- ★ Problems are reported easily, not forgotten and resolved more quickly.
- ★ Third-party companies automatically receive emails about problems.
- ★ Guests feel understood receiving a SMS when the problem is solved.

A cartoon illustration of a man in a black suit, white shirt, and red tie, standing in a modern office lobby. He is holding a white tablet in his left hand and has his right hand on his hip. The lobby features a checkered floor, a yellow sofa, framed artwork, and a potted plant. A speech bubble above him contains the text: "It's about the little things that help our teams achieve great things."

It's about the little things that help our teams achieve great things.

AUTOMATE YOUR MANAGEMENT!

www.fixalert.io

The image displays the Fixalert management system on two devices. The laptop screen shows a dashboard with a navigation menu on the left, a central summary section with filters and a 'Zatwierdź' button, and a bottom section with a line graph and a donut chart. The mobile app interface on the right shows a list of issues such as 'Display not working', 'Internet not available', and 'Fridge not working', each with details like location and assigned personnel. A floating card in the foreground features a QR code and the text 'Scan the code and report a problem:'.
